

# HyImpulse

Pioneering Europe's access to space with hybrid rockets:  
the world's 1st based on paraffin propulsion

## Problem

There are no economically viable, low-cost and highly available dedicated launch services for small satellites

## Solution

HyImpulse's hybrid rocket architecture lowers the launch cost by 50%, is highly scalable and can be launched responsively

## Key benefits

- Cost-efficient
- Sustainable
- Safe
- Responsive

**SR75** Suborbital Rocket

**SL1** Orbital Launcher

**HyMove** In-Orbit Service
